Professional Summary

I am a tier-1 performer at PwC who helped co-found our practice's AI Transformation Office and operate as a solutions engineer across the full sales cycle, building RAG pipelines, evaluation frameworks, rapid prototypes and presenting them directly to clients. Six years of consulting and industry experience developing data science and problem-solving skills, now focused on helping clients move from AI curiosity to real adoption.

Technical Skills

AI & LLM: Claude Code, Claude, Anthropic API, Azure OpenAI, Cowork, RAG pipelines, vector stores, embeddings, prompt engineering, eval frameworks, AI agents, knowledge graphs, MCP servers

Programming: Python (primary), SQL; AI-assisted development in Swift, JavaScript, HTML/CSS

Cloud & Tools: Postgres, Supabase, Vercel, CoPilot Studio, Power BI, Excel, PowerPoint, Power Automate, Salesforce; deployed on GCP, AWS, Azure

Professional Experience

Manager, PwC (PricewaterhouseCoopers)

July 2025 – Present

- Co-founded the AI Transformation Office for a 500+ person practice. Grew AI adoption from 54% to 93% through hands-on training, executive coaching, and reworking how we deliver AI-powered services
- Built rapid AI prototypes for 20 go-to-market initiatives and presented them to Fortune 500 executives across four industries
- Delivered a \$325K engagement for a global food and beverage company. Built Power Automate and CoPilot Studio agent flows using Claude Code, delivering an initial solution in 2 days and compressing a 12-week timeline to 4 weeks
- Built a climate solution platform with financial impact modeling and interactive visualizations. Integrated context-aware AI agents with RAG-powered chats, source citations, and prompt injection safeguards
- Led executive AI upskilling including weekly partner/director sessions, a three-part training series, and 1-on-1 AI-assisted development workshops with practice leadership
- Upcoming speaker at a conference on AI data centers and rate impacts, and executive leadership conference leading a 75-minute AI session

Senior Associate, PwC

June 2023 – July 2025

- Developed GenAI automation solutions using Azure OpenAI for Fortune 500 clients, creating end-to-end review pipelines with custom UX across multiple industries
- Built a RAG-powered gap assessment tool (92% accuracy vs. manual review) used on 20+ client engagements. Ingests Excel, PDF, and Word docs via embeddings and semantic similarity search
- Created a GenAI emissions extraction tool in Python to scrape granular data from large PDFs, and a Climate Disclosure Report writer ensuring regulatory compliance
- Led a 1.5-year data migration end-to-end: untangled data across organizational silos, built the migration strategy with executives, and moved everything into a structured Postgres database on GCP

Experienced Associate, PwC

May 2022 – June 2023

- Built financial and risk models for climate scenario analysis; converted Excel-based models to Python with Power BI dashboard
- Presented climate risk findings to C-level executives, turning regulatory analysis into investment and disclosure decisions

Pricing Analyst I & II, Progressive Insurance

June 2020 – May 2022

- Developed loss trend models and led concurrent data-driven pricing projects for multiple products

Personal Projects

iOS Fitness App (Swift, Supabase, Claude Code)

End-to-end fitness app with macro tracking, AI coach, Apple HealthKit sync, barcode scanning, workout tracking, push notifications, and subscription payments. 100% built with Claude Code.

Super Bowl Squares (Vercel, Supabase)

Real-time web app serving 100 concurrent users with ESPN API live scoring, admin dashboard, confetti winner animations, and zero downtime. Developed an evaluation framework and fully validated under live game conditions during the NFC Championship before Super Bowl deployment.

Education

Bachelor of Business Administration, Kent State University, 2020

Major: Economics | Minor: Entrepreneurship & Finance
